 - 11% Reduction in driving distance
 - 18% Reduction in driving hours
- Contact us to know how and to request technical assistance

Area where you can find news and information to the clients

Dear Customer,

Welcome to the new Inofleet interface, which will provide a better browsing experience.

The new interface is composed by 9 different sections, that you will find on the application top bar. Four of these areas (Home, Map, Reports and Client Area) are part of Inofleet's base solution and are available for all customers.

The remaining sections are available according to the solution contracted. You may at any time contact us via email info.inosat@inosat.com requesting a demo on the options that you do not have access to.

Detailed below are the features available in each section:

HOME: Get updated information on InoFleet

It's Inofleet homepage, where you will always find an assistance request form available, Inosat's contacts, new features, news about Inosat, etc..

MAP: Track your fleet in real time

In this section you can interact with the map in order to track your fleet in real time. You can also view the route history and interact with the map by managing POI's and geofences, among many other available features.

REPORTS: Receive fleet management information through Inofleet reports

The fleet activity management is extremely important to our customers. In the reports area, customers can obtain relevant management information whenever needed, directly from Inofleet. The reports are available in various formats and allow access to relevant information like: trips, stops, km, hours, speeding, passing POI's etc. You can also set up automatic reports that are sent to your e-mail address simplifying fleet management.

CUSTOMER AREA: Set up your account information

In the customer area you will find information regarding the user. You can view details of vehicles, drivers, points of interest, etc. You can also manage alarms, and Automatic Reports.

NAVIGATOR: Inosat team management solution

With Inosat's Navigator your field team will be able to manage more effectively services and tasks, navigate more quickly to customers and save fuel while increasing productivity.
